

Satellite radio is a service for which I pay. It is a great service. Traffic/Weather reports are available to me when I need them. I don't have to seek out local stations and await their designated time of traffic/weather broadcast which is usually too late for me to use. I feel safer in my automobile with satellite radio - I can find traffic/weather information quickly without taking my mind off the road to tune my AM/FM radio receiver. Signals are strong and audible wherever I might be. This is a wonderful service, particularly when I am traveling. it enables me to make route changes to avoid congestion which saves time and fuel. Please allow this service to continue!
